

TOLEDO HARBOR LIGHTHOUSE

Toledo, Ohio
On-going

www.duketarchitects.com

DAP is currently working with the Toledo Harbor Lighthouse Preservation Society in its quest to preserve and restore the historic lighthouse. Since its dedication on May 23, 1904, the Toledo Harbor Lighthouse continues to be an important aid for maritime navigation for the many commercial ships that continue to use the Toledo shipping channel. Located 8.4 miles from the mouth of the Maumee River, marking the entrance to the Toledo harbor, the 85 foot high Romanesque four-story brick lighthouse with attached fog signal annex building provides many opportunities for reuse of approximately 4,000 square feet, while still remaining an active guide to maritime activity. Alternative energy sources including wind turbines and photovoltaic solar panels are being considered.
